Know your numbers week: 7th -13th September 2026

Do you know your blood pressure? **High blood pressure often has no symptoms**, so the only way to know if you have it is to get it checked.

Knowing your numbers can help identify high blood pressure early and reduce your risk of serious health problems such as **heart disease and stroke**.

Why not check your blood pressure this week? You can have it checked at the GP practice, your local pharmacy, or at home if you have a suitable monitor.

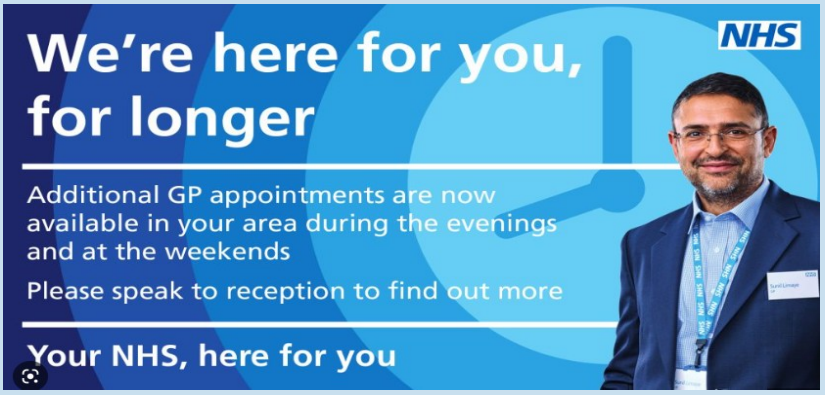

Take a few minutes to know your numbers – it could make a big difference to your health.
